

BOARD of CLALLAM COUNTY COMMISSIONERS

MINUTES for the week of September 22-26, 2025

SEP 30 2025

WORK SESSION – 9 a.m.

The work session convened at 9 a.m., Monday, September 22, 2025. Present were Commissioners Ozias, Johnson, and French and Administrator Mielke.

Items of discussion per the agenda published September 18, 2025 were:

- Calendar/Correspondence
- Agreement with Clallam County Deputy Sheriffs Guild for Patrol Deputies
- Agreement with ASSA ABLOY Entrance Systems for Courthouse single point entry
- Contract and a request for Waiver of Bid/RFP Requirements for continuation of Reassurance Solutions, LLC for a XK300 Medical Sensor, Monitor Critical Vital Signs
- Agreement with the Department of Children, Youth & Families for Evidence Based Expansion-Coordinated Services
- Agreement with Codes Corporation d/b/a Guardian RFID for web-based software for Re-Entry Program
- Resolution to Adopt the Multi -Jurisdictional Hazard Mitigation Plan Update 2024

Meeting concluded at 11:27 a.m.

REGULAR MEETING OF THE BOARD OF CLALLAM COUNTY COMMISSIONERS

Chair French called the meeting to order at 10 a.m., Tuesday, September 23, 2025. Also present were Commissioners Johnson and Ozias, and Administrator Mielke.

REQUEST FOR MODIFICATIONS/APPROVAL OF AGENDA

ACTION TAKEN: CRJm to adopt the agenda as presented, CMOs, mc

PUBLIC COMMENT FOR AGENDA ITEMS

- Ed Telenick, Sequim commented on Commissioners Forum
- Jake Seeger, Port Angeles commented on Item 4a Clallam Conservation District
- Laurel Hargis, Port Angeles commented on Item 4a Clallam Conservation District
- John Worthington, Sequim commented on Item 4a Clallam Conservation District
- Mark Curtis, Sequim commented on Item 4a Clallam Conservation District
- Sue Cauffman, Clallam County commented on Item 4a Clallam Conservation District
- David Matter, Port Angeles commented on Item 4a Clallam Conservation District
- Tim Wheeler, Sequim commented on Item 4a Clallam Conservation District
- Denise Lapio, Sequim commented on Item 4a Clallam Conservation District
- Virginia Shogren, Sequim commented on Item 4a Clallam Conservation District
- Robert James, Sequim commented on Item 4a Clallam Conservation District
- Theresa Miller, Sequim commented on Item 4a Clallam Conservation District
- Donald Beaman, Clallam County commented on Item 4a Clallam Conservation District
- Rob White, Sequim commented on Item 4a Clallam Conservation District
- Karin Cummins, Sequim commented on Item 4a Clallam Conservation District

HEARING(S)

5a Resolution authorizing allocations for the use of Title III Funds under the Secure Rural Schools and Community Self Determination Act

- Diane Harvey, Sheriff's Office, provided a staff report

ACTION TAKEN: CMOM to open the public hearing, CRJs, mc

- The following made comments:
 - Ed Bowen, Clallam Bay
 - Marolee Smith, Port Angeles
- Written testimony was sent in by: Ed Bowen (see attached)

ACTION TAKEN: CRJm to close the public hearing and adopt, CMOs, mc

PUBLIC COMMENT FOR AGENDA ITEMS CONTINUED

- Patty Eaton, Sequim, commented on Item 4a Clallam Conservation District
- Papai Whipple, Sequim commented on Item 4a Clallam Conservation District
- Jeff Tozzer, Sequim commented on public comment session, Towne Road, Item 4a Clallam Conservation District
- Eric Fehrmann, Sequim commented on Item 4a Clallam Conservation District
- John West, Clallam County commented on Item 4a Clallam Conservation District
- Jason Zizzo, Clallam County commented on Item 4a Clallam Conservation District

CONSENT AGENDA

1a Approval of vouchers for the week of September 15

The Following warrants and electronic payments are approved for payment:

Accounts Payable:	Total
Warrant numbers: 9943759-9944029	\$844,320.26
Electronic payments dates: n/a	\$0.00
Total Accounts Payable:	\$844,320.26

1b Approval of special payroll for a period ending August 31

1c Approval of payroll for a period ending August 31

The following voucher/warrants/electronic payments are approved for payment:

Payroll	Total
Warrant Numbers	
179873 – 180396, 9943638 – 9943663	\$1,421,537.84
Electronic Payment Date	
7/22/2025, 9/11/2025 – 9/15/2025	\$1,600,100.91
Total Payroll:	\$3,021,638.75

1d Approval of minutes for the week of September 15

1e Resolution to appoint Jennifer Hutto to Housing Solutions Committee

1f Resolution to appoint Abigail Barnett to Behavioral Health Advisory Board

ACTION TAKEN: CRJm to adopt the consent agenda as presented, CMOs, mc

REPORTS AND PRESENTATIONS

- CRJ commented on Stream Fest, workforce training, Timbers Counties Caucus
- CMO commented on Military Officers Association, Washington State Association of Counties
- CMF commented on Legislative Steering Committee, Washington State Association of Counties

CONTRACTS AND AGREEMENTS

2a Contract Amendment 1 with Tegria/Providence for electronic database for incarcerated individuals

ACTION TAKEN: CRJm to approve, CMOs, mc

2b Contract Amendment 2 with Tegria/Providence for electronic database for incarcerated individuals

ACTION TAKEN: CRJm to approve, CMOs, mc

2c Contract Amendment 3 with Tegria/Providence for electronic database for incarcerated individuals

ACTION TAKEN: CRJm to approve, CMOs, mc

2d Contract Amendment 4 with Tegria/Providence for electronic database for incarcerated individuals

ACTION TAKEN: CRJm to approve, CMOs, mc

Public Hearing
Ed Bowen
9/23/25
16 SEP 2025

Clallam County Board of Commissioners
223 East 4th Street, Suite 4
Port Angeles, WA 98362-3015

Public Comment to: Authorizing Allocations for the Use of Title III Funds Under the Secure Rural Schools and Community Self-Determination Act

In general I am not opposed to any of the submitted proposals and suggest the Board proceed with approving the requested public funds for the purpose stated.

If of any value to this process, I have ranked in order as a member of the public that has a long understanding of the Title III program, as to whether proposals meet the requirements of the act; not prioritized as to whether the purpose is a legitimate need by the local community for which the SRS ACT should place as a predominate factor to the proposal being legitimate for the funds:

- Clallam County Sheriff's Office for Search and Rescue Connectivity Enhancement Project
- Clallam County Fire District 6 for dry suits for Swiftwater Search and Rescue
 - With emphasis Mutual Aid for Fire District 1
- Clallam County Fire District 2 for Fire/Rescue UTV
- Clallam County Fire District 5 for Trail Rescue Kit and Training Materials
 - This would have been much higher if public trails existed in the ONF within the fire district. So, similar to being mutual aid with Fire District 1
- Clallam County Fire District 3 for Firewise Community Enrichment Program
 - The amount of the available funds along with such aspects allowed by the Act for plans that such programs should have that direct connection to the fire management plan of the ONF regarding full suppression on the forest versus naturally managed policies (wait for the rain to come).

My comment specific is I have the perception this allocation is predominately for the purpose of the county's fear it will lose this pot of money, so in addressing that I do not believe this allocation is without fault the county has not proactively manage the funds over all the years it has had the yearly deposits to the account. In that understanding, Congress didn't make it clear let alone simple enough to apply at the local area and I hold them accountable for this holding of the funds for so long. **But**, To zero out this account under this possible fear also removes a valuable funding source to be held in reserve, such as demonstrated by Jefferson County was faced with last year in its Hood Canal district joint state lands/ONF fire that called upon the local fire district to be heavily involved. Their Title III funds were used (a portion of their pot) to reimburse that un-budgeted expense on the county through its associated fire district. I comment on this in the event the Congress reauthorizes this program and the funds continue to flow in to the coffers of the county, that emphasis be placed of that type of event as has always been the primary "political" purpose of this fund from its conception; a proportion reserved even if the threat of Federal recoupment may have potential. In final, holding

in proportional reserve for such purpose versus actively utilizing the funds as they are received is my message to my county and my Federal government's use of my tax dollars. And I support equipment to meet the local community's need versus above and beyond spending for more planning. It is clear in my experience and mind, that Olympic National Forest does not have the capacity that is proposed by all of these applications and therefore recommend approval.

Regards,

Clallam County Commissioners: Mark Ozias, Randy Johnson and Mike French

I want to express my deepest thank-you for supporting Clallam County Fair Royalty and for announcing the court at our recent fair. We had a great year with the current court and we had a great fair with their participation. Fair Royalty was started in 1932 and I am proud to be a part of this program. I am going into my 20th year with this program.

Our new year starts in October with a candidate orientation. I would like to invite you to our Clallam County Fair Royalty Coronation which will be held Saturday, January 31, 2026 at the Home Arts Building on the fairgrounds. We will crown one queen and two princess's.

Also along with this I would like to thank you for your continuing support for Clallam County 4H. Our numbers are growing and it is very encouraging to see this. I would like to extend a invitation to our year end Celebrate 4H on Sunday November 2, at 2:00 pm at the Home Arts Building on the fairgrounds. This is our year end achievement day for all club members. All club members are eligible for year end awards which they apply for on October 1. It is hard for me to believe I am heading into my 25th year as a 4H leader. 4H is one of the largest youth groups in the states and does remarkable things for many kids who would not have something otherwise.

Thank you again for supporting fair royalty and 4H.

Laurie Davies

1895 was first fair.
1922 was the 2nd fair
at present site.

Princess Keir

Princess Julianne

Queen Aliya

TUESDAY, SEPTEMBER 12, 1922

ATTEND THE FAIR

The Eighth Annual Clallam County Fair, opening its doors to the public on next Thursday morning, September 14, and continuing for three days thereafter, marks another milestone in the progress of Clallam County and witnesses the opening of the greatest county fair ever seen here.

Starting some years ago with a few exhibits, the County Fair idea has grown and keeping pace with the development of the County, will this year eclipse all other efforts and be one worthy of Clallam County, the fairest spot in the Evergreen State.

County Fairs are not just exhibits of blooded cattle, big pumpkins and squash, and the joys of having a good time at the concessions, but they are the meeting place for the exchange of ideas by the people of the county. They should have, and do have, great educational value, and we challenge anyone after visiting the Eighth Annual Fair to leave there without getting some ideas of value. They will find some feature there that will interest them and fix itself upon their minds and something of value to take home with them that will mean money in their pockets.

The County Fair will be the meeting place of every one in Clallam County. It is there that you will meet friends that you have not perhaps seen for years and acquaintances of long ago will be renewed that will make everyone feel better.

To the newcomer, the fair will be of especial interest, for there he will see illustrated in a graphic form every phase of industry in Clallam County and he will become better acquainted with the possibilities and the resources of the county in a day than he would in years of residence here.

Every broadminded citizen of Port Angeles and of Clallam County will visit the County Fair, look over the varied exhibits, join in the fun and come away a broader and better citizen and a better booster for Clallam, Washington's fairest county.

Subject: Online Form Submission #8161 for Contact the Clerk of the Board

Contact the Clerk of the Board

First Name	Julia
Last Name	Hunt
Email	juliarhunt@icloud.com
Phone	2064982604
Subject	CCD proposed rates and charges parcel fee, 2025
Comments	This letter outlines some reasons why the Clallam County Commissioners should reject the Clallam Conservation District (CCD) 2025 parcel fee proposal ("In the Matter of Approving a System of Rates and Charges on Parcels..."). - Lack of Reporting Data The CCD's 2024 Accomplishments Report listed on the CCD web site quantifies various instances of "assistance" delivered (forest protection, restoration, stewardship, sustainable landscaping, habitat, etc.) but no data reflecting clients' implementation of or adherence to practices, consultation outcomes, or return on investment. The link to the 2023 Accomplishments Report isn't listed on the live web site at all; I had to search the Internet Archive Wayback Machine to find it. Citizens not only need data on program outcomes, they also need to compare program success over time. The CCD is not providing the transparency citizens need to evaluate whether their investment in CCD is justifiable. - Duplication of Services -- Soil moisture monitoring Many CCD services are already provided by other entities, some of whom provide better resources for CCD's target clients. For example, WSU Clallam Extension offers extensive resources and support for soil moisture sensor installation and use (https://extension.wsu.edu/clallam/water-conservation). The CCD's "2025 Detailed Work Plan" lists the goal of assisting "1 farm with installation of soil moisture monitoring stations"

and partnering with WSU Clallam Extension “to promote soil moisture monitoring.” However, the only mentions of soil sensors on the CCD’s web site are from 2013 and 2021. The dearth of useful information combined with the minimal yearly target of installing moisture monitoring equipment on a single farm shows that the CCD can’t offer sufficient support for the program compared to WSU Clallam Extension.

-- Youth environmental education

The CCD’s 2025 Detailed Work Plan lists numerous youth education goals, including cultivating “relationships with Clallam County school districts to develop ongoing conservation education programs.” However, I could find no information on CCD’s curriculum or lesson plans. Does CCD use Washington Office of Superintendent of Public Instruction (OSPI) Environmental and Sustainability Education (ESE) available resources for its school programs? What are program learning outcomes for past years? What are CCD staff’s K-12 education credentials?

In contrast, the North Olympic Salmon Coalition’s “Salmon in the Schools” program offers field trips and in-school lessons to elementary students, and its curriculum is developed in partnership with the OSPI. Its web site describes learning outcomes for its programs.

As the CCD has published no reports on the results of its youth education programs, these services are better managed by organizations who are transparent about program success and partner with organizations with longstanding K-12 education expertise.

I’d like the CCD to improve program tracking and reporting, increase curriculum transparency, and reduce duplication of effort with other organizations before requesting additional funding. The CCD provides some valuable services, but citizens need data to evaluate program effectiveness and decide whether additional taxes are justified.

Thank you for the opportunity to provide input on this proposal.

Gores, Loni

From: Eric Fehrmann <efehrm_3@hotmail.com>
Sent: Thursday, September 4, 2025 8:58 AM
To: Gores, Loni
Subject: Clallam Conservation District Fee

Loni

Please forward this to our three commissioners.

Thank You

Eric Fehrmann

I urge the Clallam County Board of Commissioners to require the Clallam Conservation District (CCD) to reduce its overhead by an amount equal to the amount of 'income' derived from the parcel fee requested, before voting to implement the fee levy. This would be more in line with the comment by Mark Curtis, Tuesday Sept. 2, 2025 public hearing. This would indicate a spirit of cooperation and partnership with the parcel owners of Clallam County and its governmental agencies. If I were asking a lending agency for money to improve my business, wouldn't the agency look for similar concessions? The CCD began as a totally volunteer organization and is now a business and should be able to show a positive return on investment if asking for more investor, as in property owners, dollars.

Subject: Re: I cannot afford another \$5.00 fee on my property taxes
To: Ozias, Mark <mark.ozias@clallamcountywa.gov>

Dear Commissioner Ozias:

Thank you for your email and response. Respectfully, I don't agree with this non essential fee. You stated the County has a tight budget. I have a tight budget and I cannot afford this modest fees on my property tax bill today or in the future.

I have reread the Clallam County Conservation District website several times, and believe the Supervisor needs to locate more grant money, or reduce staff compensation. Clallam County property owners are not a bank for the CCD.

You must of known this District wanted money. Perhaps the over top tax payer donation of \$800K to CC Habitat for Humanity should of been denied. What other fees are you looking to penalize property owners with?

I am not the only person that opposes this \$5.00 fee. Please listen to you constituents and retract this fee.

As a property owner, I need every dollar in my budget to cover essential bills like monthly medical expenses, home and car insurance, pay my monthly HOAs that pay to test our community septic system, water bill to Cascadia Water LLC-my water system is owned by a private equity firm with aggressive water rates goals; gas for my car, and food.

This \$5.00 fee is not prudent and an unfair tax for the Clallam County property owners.

Thank you,
Terri DiMartino
Sequim, Washington

On Fri, Sep 5, 2025, 9:25 AM Ozias, Mark <mark.ozias@clallamcountywa.gov> wrote:

Thank you for writing to share your position on a parcel fee to support the Clallam Conservation District. I understand why you do not support this concept. After careful consideration, I have come to a different conclusion and I want to try to share my reasoning. I apologize in advance for the length of this email, but I owe you a thorough explanation – especially if you do not agree with my position.

Conservation Districts are neither businesses or non-profit organizations. In Washington, conservation districts are subdivisions of state government that were authorized by the Washington State Legislature under the Soil and Water Conservation Act of 1939, which is codified as RCW 89.08. The act's preamble starts by stating, "... the lands of the state of Washington are among the basic assets of the state and that the preservation of these lands is necessary to protect and promote the health, safety, and general welfare of its people..." The Clallam Conservation District was formed in 1959.

Our own Clallam County Comprehensive Plan (the guidance document that has been created and amended through public process for more than twenty years, and the document on which we rely to help us understand the desired conditions we are attempting to achieve) echoes the primary importance of land conservation; not only is there language throughout the document highlighting the vital nature of healthy natural habitats and preserved natural resources to our population, but agricultural resource lands are the very first to be addressed, even before forest lands.

Several of the agricultural resource goals outlined in our Comprehensive Plan make specific mention of the Clallam Conservation District; others speak to activities that the Conservation District supports such as water quality improvement, preservation of local food security and educating and supporting local farmers. For example, Goal 7 states "Clallam County shall support the work of the Clallam Conservation District to assist agricultural land users with maintenance and improvement of water quality, conservation of irrigation water, protection and enhancement of fish and wildlife habitat and biological diversity consistent with commercial agriculture, and prevention of erosion of valuable agricultural soils."

On the ground here in Clallam County, this is exactly what the Conservation District accomplishes. They work to improve water quality by working directly with farmers to amend practices to reduce or eliminate the potential for fecal contamination of nearby rivers and streams. They work to improve water quality by partnering with the Environmental Health team to provide technical and financial assistance to local homeowners with failing septic systems. They work to improve habitat through the promotion of native plants and through riparian planting projects to support local

landowners. They work to help improve water availability and support fish habitat through partnerships with local irrigation districts. They work with farmers to improve soil health and tilth.

They are a vital partner to numerous landowners in our county, as well as to local and state government and the benefits they work to achieve – like improved water quality – impact all of us. For example, a failing septic system creates an immediate environmental health concern for any nearby resident, but it also leaches contaminants down through the water table. When enough of these contaminants accumulate we see things like large marine areas being closed to shellfish harvesting. This is just one example, but representative of most all of the work that the Conservation District accomplishes.

Even though Conservation Districts are a subdivision of state government, the Legislature has not identified a dedicated source to fund this work. The Clallam Conservation District is funded largely through a variety of grants, allocated through various state and sometimes federal agencies. These grants are typically competitive and are geared to supporting a certain activity; there are no grants available to cover non-programmatic expenses such as maintaining a website, responding to public records requests or managing District elections.

Due to the vital nature of the Clallam Conservation District, and in recognition of the constraints imposed by having no unrestricted resource to carry out basic required functions like the above, the County Commissioners have historically made an annual allocation of General Fund dollars to support this work.

Now, due to the significant budget constraints we and all counties are experiencing, we are no longer in the position of being able to allocate funds to support the Conservation District. Yet their work is more important than ever.

As we have looked outward to other counties and other Conservation Districts, we have learned that the most effective Districts operate with dedicated support from their community, either through a special assessment or through a per parcel and/or per acre fee.

The elected leaders of the Clallam Conservation District have done a thorough analysis of these options and are recommending a \$5 per parcel fee, which is what we are currently considering. In conversation

after Tuesday's public hearing on this matter the Board favored moving forward with this \$5 fee, but with some boundaries:

- Setting a ten year "sunset" of this fee so that a future Board of County Commissioners has the opportunity to review the effectiveness and impact of the parcel fee before determining whether to keep it, drop it or amend it.
- Adding language to clarify that the fee will remain at \$5 for the entirety of the ten year period, with no CPI or other cost escalator.
- Requiring an annual report to the Commissioners and the public.

One of my foundational beliefs as an elected official is that once we have gone through a public process that establishes priorities and objectives – in other words, once we as a community have described what we wish to see – it is my job to work with my colleagues and the community to see that we are successful in addressing those priorities and meeting those objectives.

In this case, if we are to be successful in addressing some of our most important priorities and objectives, we need the existence and expertise of the Clallam Conservation District. Since the state has provided us with no dedicated funding but a variety of expected outcomes; we are moving forward with a strategy that will ensure this organization has the ability to meet both the needs of county residents and local governments alike.

I recognize that many in our community struggle to meet their financial needs and that any additional tax or fee is a burden. If we were able to continue to allocate general fund dollars, I would not favor this fee. If it wasn't important to support the agricultural sector in our community, or if we lived in a county with few habitat concerns, I would not favor this fee. If our Comprehensive Plan did not speak both specifically to the importance of the Clallam Conservation District and to the work it supports and facilitates, I would not favor this fee. If I did not believe that this work results in broad community benefit and long-term cost savings, I would not favor this fee.

However, this is not the reality we face and therefore I support the recommendation of the elected leaders of the Clallam Conservation District to move forward with this modest fee, with the guardrails described above.

To address your specific questions, every parcel will pay this fee (forest parcels have a different rate) and there is no accommodation in state law to allow for a vote of the public. I don't think it is accurate to say that the CCD has no goals or direction; they have a clear suite of priorities that are reinforced throughout our Comprehensive Plan and a track record of success.

Sincerely,

Mark Ozias

Subject: I cannot afford another \$5.00 fee on my property taxes

Dear Commissioners:

I listened to the fee meeting discussions yesterday and felt like I was in a meeting that I wasn't invited too. It seems evident that all 3 of you had your minds made up beforehand about this fee.

Why isn't every household in Clallam County asked to pay this fee for clean water and air?

I object to this fee going to an organization that has no clear goals or direction. Why the urgency to approve this? Why not put it to a vote?

Please respond back to my questions.

Thank you,
Terri DiMartino

Subject: Re: 9.2.2025: BOCC Correspondence Submission Clallam Conservation District Parcel Fee Proposal

Clerk Gores, please file this as late correspondence for the Sept. 2, 2025, public hearing on the CCD rates & charges agenda item, and forward it to all Commissioners; if the cutoff has passed, please note it in the hearing record and provide it to the Board before deliberation.

Commissioner Ozias,

Thank you for the thoughtful note. I can accept the 10-year term you and the Board prefer if the resolution includes a simple, lawful Nonbenefited Lands = \$0 classification under RCW 89.08.405. That keeps the fee performance-based: parcels pay when CCD services/benefits are actually furnished or practically available during the term—not “just in case.”

For me personally, that means my residential parcels should be in Nonbenefited Lands (\$0) until I elect to use CCD services (at which point the charge can apply prospectively).

The Nonbenefited → Benefited concept by using the classification discretion in RCW 89.08.405, which expressly allows rates to reflect services furnished or available, benefits received or available, land use/character, and other reasonable distinctions, and by borrowing the ‘benefit principle’ from RCW 89.08.400(3) (where non-benefited lands aren’t charged). In practice, parcels start in a Nonbenefited Lands (\$0) class when no CCD service or practical program access is furnished or reasonably available during the term. When a parcel actually receives a service or enters a CCD program (e.g., a funded project, cost-share award, or formal enrollment), it converts prospectively to a benefited class and the charge applies beginning with the next tax year. This keeps the fee performance-based owners pay when there’s real service/benefit while incentivizing CCD outreach and delivery. A simple one-page claim and plain-language appeal standard make the process workable for residents and staff.

Below is paste-ready text you could amend in the resolution without changing your other guardrails.

Minimal insertion #1 — Finding (authority)

WHEREAS, RCW 89.08.405(2) (a)–(c) and (f) authorize the Board to set classes and rates considering services furnished or available, benefits received or available, the character and use of the land, and other reasonable distinctions; and

Minimal insertion #2 — Add a class to the rate table

7 - Nonbenefited Lands \$0.00 per parcel / year

Minimal insertion #3 — Definition + simple process

Nonbenefited Lands — Definition & Process.

(1) Definition. "Nonbenefited Lands" are parcels that do not receive, and are not reasonably

expected to receive during the term of this system, services or benefits from District

programs, considering services furnished or available, benefits received or available,

the character and use of the land, and other reasonable distinctions.

(2) Simple claim. Within 30 days, the District will post a one-page claim form (online/email/

mail/in-person). Approved parcels are classified at \$0 for the remainder of the term, unless converted under subsection (3).

(3) Conversion rule. When a parcel receives a District service or a written program enrollment/

award for that parcel, the classification changes prospectively beginning with the next

tax year; the District shall notify the owner of the change.

(4) Coordination. Approved classifications shall be transmitted to the Assessor/Treasurer for

roll updates and adjustments/refunds as applicable.

Minimal insertion #4 — One sentence to appeal (end of existing paragraph)

For Nonbenefited Lands claims, appeals may be filed online/email/mail/in-person without prepayment; when the owner provides credible documentation, the District bears the burden to establish the correct classification by a preponderance of the evidence.

This approach does not undermine CCD's mission; it rewards outreach and delivery. If CCD reaches a parcel class with real, practical offerings this term, they can charge it; if not, owners aren't billed. It's a fair middle ground that should help with public trust and compliance.

Thank you for considering this addition.

Respectfully,

Dr. Sarah Huling, EdD, MBA

Thank you for writing to share your position on a parcel fee to support the Clallam Conservation District. I understand why you do not support this concept. After careful consideration, I have come to a different conclusion and I want to try to share my reasoning. I apologize in advance for the length of this email, but I owe you a thorough explanation – especially if you do not agree with my position.

Conservation Districts are neither businesses or non-profit organizations. In Washington, conservation districts are subdivisions of state government that were authorized by the Washington State Legislature under the Soil and Water Conservation Act of 1939, which is codified as RCW 89.08. The act's preamble starts by stating, "... the lands of the state of Washington are among the basic assets of the state and that the preservation of these lands is necessary to protect and promote the health, safety, and general welfare of its people..." The Clallam Conservation District was formed in 1959.

Our own Clallam County Comprehensive Plan (the guidance document that has been created and amended through public process for more than twenty years, and the document on which we rely to help us understand the desired conditions we are attempting to achieve) echoes the primary importance of land conservation; not only is there language throughout the document highlighting the vital nature of healthy natural habitats and preserved natural resources to our population, but agricultural resource lands are the very first to be addressed, even before forest lands.

Several of the agricultural resource goals outlined in our Comprehensive Plan make specific mention of the Clallam Conservation District; others speak to activities that the Conservation District supports such as water quality improvement, preservation of local food security and educating and supporting local farmers. For example, Goal 7 states "Clallam County shall support the work of the Clallam Conservation District to assist agricultural land users with maintenance and improvement of water quality, conservation of irrigation water, protection and enhancement of fish and wildlife habitat and biological diversity consistent with commercial agriculture, and prevention of erosion of valuable agricultural soils."

On the ground here in Clallam County, this is exactly what the Conservation District accomplishes. They work to improve water quality by working directly with farmers to amend practices to reduce or eliminate the potential for fecal contamination of nearby rivers and streams. They work to improve water quality by partnering with the Environmental Health team to provide technical and financial assistance to local homeowners with failing septic systems. They work to improve habitat through the promotion of native plants and through riparian planting projects to support local landowners. They work to help improve water availability and support fish habitat through partnerships with local irrigation districts. They work with farmers to improve soil health and tilth.

They are a vital partner to numerous landowners in our county, as well as to local and state government and the benefits they work to achieve – like improved water quality – impact all of us. For example, a failing septic system creates an immediate environmental health concern for any nearby resident, but it

also leaches contaminants down through the water table. When enough of these contaminants accumulate we see things like large marine areas being closed to shellfish harvesting. This is just one example, but representative of most all of the work that the Conservation District accomplishes.

Even though Conservation Districts are a subdivision of state government, the Legislature has not identified a dedicated source to fund this work. The Clallam Conservation District is funded largely through a variety of grants, allocated through various state and sometimes federal agencies. These grants are typically competitive and are geared to supporting a certain activity; there are no grants available to cover non-programmatic expenses such as maintaining a website, responding to public records requests or managing District elections.

Due to the vital nature of the Clallam Conservation District, and in recognition of the constraints imposed by having no unrestricted resource to carry out basic required functions like the above, the County Commissioners have historically made an annual allocation of General Fund dollars to support this work.

Now, due to the significant budget constraints we and all counties are experiencing, we are no longer in the position of being able to allocate funds to support the Conservation District. Yet their work is more important than ever.

As we have looked outward to other counties and other Conservation Districts, we have learned that the most effective Districts operate with dedicated support from their community, either through a special assessment or through a per parcel and/or per acre fee.

The elected leaders of the Clallam Conservation District have done a thorough analysis of these options and are recommending a \$5 per parcel fee, which is what we are currently considering. In conversation after Tuesday's public hearing on this matter the Board favored moving forward with this \$5 fee, but with some boundaries:

- Setting a ten year "sunset" of this fee so that a future Board of County Commissioners has the opportunity to review the effectiveness and impact of the parcel fee before determining whether to keep it, drop it or amend it.

- Adding language to clarify that the fee will remain at \$5 for the entirety of the ten year period, with no CPI or other cost escalator.
- Requiring an annual report to the Commissioners and the public.

One of my foundational beliefs as an elected official is that once we have gone through a public process that establishes priorities and objectives – in other words, once we as a community have described what we wish to see – it is my job to work with my colleagues and the community to see that we are successful in addressing those priorities and meeting those objectives.

In this case, if we are to be successful in addressing some of our most important priorities and objectives, we need the existence and expertise of the Clallam Conservation District. Since the state has provided us with no dedicated funding but a variety of expected outcomes; we are moving forward with a strategy that will ensure this organization has the ability to meet both the needs of county residents and local governments alike.

I recognize that many in our community struggle to meet their financial needs and that any additional tax or fee is a burden. If we were able to continue to allocate general fund dollars, I would not favor this fee. If it wasn't important to support the agricultural sector in our community, or if we lived in a county with few habitat concerns, I would not favor this fee. If our Comprehensive Plan did not speak both specifically to the importance of the Clallam Conservation District and to the work it supports and facilitates, I would not favor this fee. If I did not believe that this work results in broad community benefit and long-term cost savings, I would not favor this fee.

However, this is not the reality we face and therefore I support the recommendation of the elected leaders of the Clallam Conservation District to move forward with this modest fee, with the guardrails described above.

Sincerely,

Mark Ozias

Subject: Re: 9.2.2025: BOCC Correspondence Submission Clallam Conservation District Parcel Fee Proposal

Subject: Sept. 2 CCD “rates & charges” — since my Aug 20 letter: please VOTE NO or defer; if proceeding, adopt owner protections

Dear Commissioners French, Johnson, and Ozias,

Please enter this correspondence into the record for the September 2, 2025, hearing on the Clallam Conservation District (CCD) parcel “rates & charges.”

What’s changed since my August 20, 2025, email

In the 11 days since my first letter, I’ve reviewed the statute, the draft resolution, and comparable district practices. That work clarified several material points that sharpen my request:

- **Tax-roll collection & liens:** If approved, the CCD charge is placed on property-tax bills, and any unpaid amount becomes a lien with tax-like interest/penalties.
- **Petition safety valve:** If $\geq 20\%$ of affected owners file a petition by December 15, 2025, the 2026 collection is blocked.
- **Appeals are short and internal to CCD:** Owners have 21 days after the property-tax due date to appeal to CCD; CCD’s decision is final, subject to 21 days for court review.
- **Higher statutory ceiling than many assume:** Current law authorizes up to \$25 per parcel (CPI-indexed going forward) and treats forestland differently (no per-parcel charge; special alternatives).
- **Term is a policy choice:** The statute does not set a minimum or maximum term for “rates & charges,” so a one-year system is lawful.

Bottom line (updated)

Given these mechanics and risks, I now strongly urge a **NO vote** on September 2—or at minimum a deferral until after the November levy outcomes so staff can return with an owner-protective alternative.

If you proceed on Sept. 2, please adopt all five of these safeguards

Each item is lawful and can be included as a condition of approval:

1. One-year only (2026) with a Dec. 31, 2026, sunset and a new public hearing for any renewal.
2. Minimal nominal rates for 2026; for forestland, use the per-owner method permitted by statute (no per-parcel).
3. Automatic relief tied to Assessor records: automatic recognition of low-income senior/disabled approvals; honor other property-tax exemptions; waive while deferrals are active.
4. Appeals people can use: accept appeals online/email/mail/in-person; no prepayment required; apply a preponderance standard with a rebuttable presumption when owners provide credible documents (misclassification/exemption); route land-use/acreage fixes directly to the Assessor.
5. Plain-language notice: mail/post a one-pager that clearly states tax-roll collection, lien if unpaid, the appeal clock, and the Dec. 15 petition right.

Values & funding (unchanged)

I continue to value CCD's on-the-ground work—watershed protection, habitat, soil health, and septic assistance. The question is how to fund it fairly. A short-term, minimal-rate framework with clear relief and due-process protections respects both the law and the people you serve—and lets you reassess after the levy outcomes.

Thank you for considering a path that protects residents and preserves the Board's flexibility. Please **vote NO** on September 2—or defer to allow a better, safer design.

Respectfully,
Dr. Sarah Huling, EdD, MBA

Subject: No to \$5.00 Clallam County Conservation District fee
Attachments: 1000045939.jpg; 1000045938.jpg

Dear Loni,
Please share my email against the \$5.00 CCD fee with all three commissioners.
Thank you very much.

Dear Commissioners:
I will not vote yes to increase my property taxes for essential services this November when the three of you support for a \$5.00 conservation district for activities like farm tours, please see a recent CCD Facebook screenshot.

Why is the conservation district duplicating services the Washington State University Extension Program, a highly educated organization with established presence in our county and region already provides? WSU has far more programs, experience, and education in farming, animal care, soil renurishment, water conservation, outreach on the Clallam County Comprehensive Plan, and beyond, please see 2nd screenshot below.

Please retract this \$5.00 fee now. The WSU Extension Program is not demanding property owners to fund their activities.

It is my opinion the \$5.00 fee is another way to tax property owners for special interest organizations.

All three of you need to drive around Clallam County and observe how most people don't maintain their property. Some look like junk yards for cars that haven't run in 20 years, fields that are never mowed and house roof's with inches of moss. I doubt the CCD can stop the toxins old cars leach in ground soil.

We are a poor county with a beyond average standard of living and no jobs other than tourism and service. Why aren't you focused on uplifting Clallam County instead of spending your previous time on non essential fees. This fee does nothing to improve anyone's standard of living, safety, security, safe drinking water, clean air or medical needs. What legacy are you leaving behind that improves your constituents lives now?

2h · 🌐

We have some upcoming horse and livestock workshops for September! Join the Clallam Conservation District staff for a tour of a horse farm on September 15th and a multi-species farm tour on September 23rd. Attendees can learn about topics such as rotational grazing, mud-free paddocks, irrigation practices, and more!

Both workshops are free, but registration is required! Please register on our 2025 Farm Workshop Registration page:

<https://clallamcd.org/2025-farm-workshops>

#horses #livestock #farming #sequim
#portangeles #workshop

HORSE & LIVESTOCK WORKSHOPS

Horse Farm Tour

WHEN: September 15 (Monday) from 1:00 – 2:30 PM
WHERE: Blue Mountain Road in Port Angeles

Join Clallam Conservation District planners for a tour of a horse farm located approximately four miles up Blue Mountain Road in Port Angeles. Nestled in the foothills of the Olympics, this tour will showcase how the farm owner uses mud-free paddocks to support a rotational grazing system. Attendees will also learn how native trees and shrubs—both existing and newly planted—can be integrated into farm areas for shade and visual appeal. The tour will also highlight future plans for a track paddock to help exercise horses while allowing pastures to regrow, as well as a rainwater catchment system for emergency use.

Multi-Species Farm Tour

WHEN: September 23 (Tuesday) from 10:00 – 11:30 AM
WHERE: Agnew, mid-way between Port Angeles & Sequim

Tour an intensive, pasture-based farm operation located in Agnew, midway between Port Angeles and Sequim, with the owners of Bentgate Farm and Clallam Conservation District staff. Bentgate Farm raises grass-fed beef, lamb, goats, pork, and several horses. The tour will cover a variety of topics including multi-species rotational grazing, irrigation and soil fertility practices, seasonal pasture management, pasture grass identification, and pasture re-seeding techniques. This is a great opportunity to see sustainable, multi-species farming in action.

Subject: Supporting conservation services

You don't often get email from lcmc4782@gmail.com. [Learn why this is important](#)

Dear County Commissioners,

I am writing to express my strong support for the Clallam Conservation Districts proposal to establish a Rates and Charges system at \$5 parcel fee to sustain essential core conservation services.

The proposed **\$5 per parcel /per year** is a small contribution for property owners yet will fill critical funding gaps for the Conservation District yet it is a big investment to helping preserve and improve the natural resources of the peninsula.

With this local revenue, CCD can maintain and expand core programs at current service levels, respond to increasing demand, and continue matching outside grants. Without a stable funding source, some services will be strained, reduced or eliminated, undermining long-term environmental gains.

This fee keeps CCD's operations sustainable and ensures that Clallam County remains proactive—rather than reactive—when addressing water quality and water supply issues, supporting viable agriculture, and emerging conservation needs such as wildfire prevention programs.

For 66 years, CCD has provided information, technical guidance, and financial support at no cost, leveraging state and federal grants to deliver services that enhance soil productivity, protect water quality, and improve and restore habitat for the good of all county residents. The CCD is a part of the history of this county, as it was built by local farmers, for local needs.

CCD is an important part of the natural resources community. As a new resident of Sequim (since January 2025), we have witnessed how CCD's expertise regarding natural resources has benefited the farm community. We have been purchasing Chi's Farm CSA shares since we moved here, and find that the fresh produce and thriving farms supported by CCD is so critical to what makes Sequim and the surrounding area special. By investing in CCD's programs, together we can support our local farmers by foster resilient agricultural lands and help to improve and keep the peninsula pristine.

We respectfully urge the Clallam County Board of Commissioners to adopt the CCD's proposed rates-and-charges proposal as filed. The \$5/parcel fee is an investment in our shared future: it supports local agriculture, protects our precious water resources, and sustains a non-regulatory, local conservation that benefits everyone in Clallam County. Please feel free to contact us at this email if you have questions. Thank you for your consideration of this important local investment in conservation. Together we are stronger!

Sincerely,

Laurie and Mark McCulley

To: Ozias, Mark
Cc: Gores, Loni
Subject: Re: 9.2.2025: BOCC Correspondence Submission Clallam Conservation District Parcel Fee Proposal

Clerk Gores — please file this as correspondence on the CCD rates & charges item and forward to all Commissioners for consideration before the vote. Thank you.

Commissioner Ozias,

Thanks for your thoughtful reply. To clarify: I'm not proposing a switch to RCW 89.08.400 (special assessments). I'm asking you to stay with RCW 89.08.405 (rates & charges) and add a \$0 "Nonbenefited Lands" classification using .405(2) (services/benefits furnished or reasonably available during the term; land use/character; other reasonable distinctions). Parcels would start at \$0 when no CCD service or practical program access is furnished/available this term, and convert prospectively to a paid class the next tax year if/when a parcel actually receives a CCD service or formal program award/enrollment. This keeps your preferred framework (including a 10-year term) but makes the fee performance-based and fair.

Paste-ready amendment (minimal edits):

1. Authority finding (add after existing findings):

WHEREAS, RCW 89.08.405(2) (a)-(c) and (f) authorize the Board to set classes and rates considering services furnished or available, benefits received or available, the character and use of the land, and other reasonable distinctions;

2. Add a class to the rate table:

7 - Nonbenefited Lands \$0.00 per parcel / year

3. Add a short subsection after the table (definition + simple process):

Nonbenefited Lands — Definition & Process.

- (1) "Nonbenefited Lands" are parcels that do not receive, and are not reasonably expected to receive during the term of this system, services or benefits from District programs, considering services furnished or available, benefits received or available, the character and use of the land, and other reasonable distinctions.
- (2) Within 30 days of adoption, the District shall publish plain-language eligibility criteria and a one-page claim form (online/email/mail/in-person). Approved parcels are classified at \$0 for the remainder of the term, unless converted under subsection (3).
- (3) Prospective conversion: When a parcel receives a District service or a written program

enrollment/award for that parcel, the classification changes prospectively beginning with

the next tax year; the owner shall be notified.

(4) Coordination: The District shall transmit approved classifications to the County Assessor

and Treasurer for roll updates and any adjustments/refunds as applicable.

4. Append one sentence to the existing appeals paragraph:

For Nonbenefited Lands claims, appeals may be filed online/email/mail/in-person without prepayment; when the owner provides credible documentation, the District bears the burden to establish the correct classification by a preponderance of the evidence.

Thank you for considering this small, targeted amendment that keeps the District's mission on track while tying the charge to actual service/benefit during the term.

On Mon, Sep 8, 2025 at 10:52 AM Ozias, Mark <mark.ozias@clallamcountywa.gov> wrote:

Dr. Huling,

Thank you for your correspondence. I raised this concept (special assessment vs. rates/charges) with the CCD during last week's public hearing and asked specifically why the recommendation was made to utilize rates/charges.

The explanation provided made sense to me. First, a special assessment requires that the work being done results in an actual increase in assessed property value. Not only is this a high bar, but there are many aspects of CCD's work that generate a benefit without necessarily changing the value of a property. Consider a farm that, through consultation with the CCD, achieves a significant water savings through an amended irrigation practice. Changing an irrigation practice would not likely impact the value of a property, yet creates a broad benefit nonetheless.

Second, the special assessment pathway does not afford flexible dollars which are what is most-needed to ensure that the CCD can meet its mission and obligations. I am aware that not all agree with my perspective, but I firmly believe that there is in fact broad community benefit achieved through the work of the CCD which is why I support the proposal.

Sincerely,

Mark Ozias

Subject: Re: 9.2.2025: BOCC Correspondence Submission Clallam Conservation District Parcel Fee Proposal

Clerk Gores, please file this as late correspondence for the Sept. 2, 2025, public hearing on the CCD rates & charges agenda item, and forward it to all Commissioners; if the cutoff has passed, please note it in the hearing record and provide it to the Board before deliberation.

Commissioner Ozias,

Thank you for the thoughtful note. I can accept the 10-year term you and the Board prefer if the resolution includes a simple, lawful Nonbenefited Lands = \$0 classification under RCW 89.08.405. That keeps the fee performance-based: parcels pay when CCD services/benefits are actually furnished or practically available during the term—not “just in case.”

For me personally, that means my residential parcels should be in Nonbenefited Lands (\$0) until I elect to use CCD services (at which point the charge can apply prospectively).

The Nonbenefited → Benefited concept by using the classification discretion in RCW 89.08.405, which expressly allows rates to reflect services furnished or available, benefits received or available, land use/character, and other reasonable distinctions, and by borrowing the ‘benefit principle’ from RCW 89.08.400(3) (where non-benefited lands aren’t charged). In practice, parcels start in a Nonbenefited Lands (\$0) class when no CCD service or practical program access is furnished or reasonably available during the term. When a parcel actually receives a service or enters a CCD program (e.g., a funded project, cost-share award, or formal enrollment), it converts prospectively to a benefited class and the charge applies beginning with the next tax year. This keeps the fee performance-based owners pay when there’s real service/benefit while incentivizing CCD outreach and delivery. A simple one-page claim and plain-language appeal standard make the process workable for residents and staff.

Below is paste-ready text you could amend in the resolution without changing your other guardrails.

Minimal insertion #1 — Finding (authority)

WHEREAS, RCW 89.08.405(2)(a)-(c) and (f) authorize the Board to set classes and rates considering services furnished or available, benefits received or available, the character and use of the land, and other reasonable distinctions; and

Minimal insertion #2 — Add a class to the rate table

7 - Nonbenefited Lands \$0.00 per parcel / year

Minimal insertion #3 — Definition + simple process

Nonbenefited Lands - Definition & Process.

(1) Definition. "Nonbenefited Lands" are parcels that do not receive, and are not reasonably

expected to receive during the term of this system, services or benefits from District

programs, considering services furnished or available, benefits received or available,

the character and use of the land, and other reasonable distinctions.

(2) Simple claim. Within 30 days, the District will post a one-page claim form (online/email/

mail/in-person). Approved parcels are classified at \$0 for the remainder of the term, unless converted under subsection (3).

(3) Conversion rule. When a parcel receives a District service or a written program enrollment/

award for that parcel, the classification changes prospectively beginning with the next

tax year; the District shall notify the owner of the change.

(4) Coordination. Approved classifications shall be transmitted to the Assessor/Treasurer for

roll updates and adjustments/refunds as applicable.

Minimal insertion #4 — One sentence to appeal (end of existing paragraph)

For Nonbenefited Lands claims, appeals may be filed online/email/mail/in-person without prepayment; when the owner provides credible documentation, the District bears the burden to establish the correct classification by a preponderance of the evidence.

This approach does not undermine CCD's mission; it rewards outreach and delivery. If CCD reaches a parcel class with real, practical offerings this term, they can charge it; if not, owners aren't billed. It's a fair middle ground that should help with public trust and compliance.

Thank you for considering this addition.

Respectfully,

Dr. Sarah Huling, EdD, MBA

Thank you for writing to share your position on a parcel fee to support the Clallam Conservation District. I understand why you do not support this concept. After careful consideration, I have come to a different conclusion and I want to try to share my reasoning. I apologize in advance for the length of this email, but I owe you a thorough explanation – especially if you do not agree with my position.

Conservation Districts are neither businesses or non-profit organizations. In Washington, conservation districts are subdivisions of state government that were authorized by the Washington State Legislature under the Soil and Water Conservation Act of 1939, which is codified as RCW 89.08. The act's preamble starts by stating, "... the lands of the state of Washington are among the basic assets of the state and that the preservation of these lands is necessary to protect and promote the health, safety, and general welfare of its people..." The Clallam Conservation District was formed in 1959.

Our own Clallam County Comprehensive Plan (the guidance document that has been created and amended through public process for more than twenty years, and the document on which we rely to help us understand the desired conditions we are attempting to achieve) echoes the primary importance of land conservation; not only is there language throughout the document highlighting the vital nature of healthy natural habitats and preserved natural resources to our population, but agricultural resource lands are the very first to be addressed, even before forest lands.

Several of the agricultural resource goals outlined in our Comprehensive Plan make specific mention of the Clallam Conservation District; others speak to activities that the Conservation District supports such as water quality improvement, preservation of local food security and educating and supporting local farmers. For example, Goal 7 states "Clallam County shall support the work of the Clallam Conservation District to assist agricultural land users with maintenance and improvement of water quality, conservation of irrigation water, protection and enhancement of fish and wildlife habitat and biological diversity consistent with commercial agriculture, and prevention of erosion of valuable agricultural soils."

On the ground here in Clallam County, this is exactly what the Conservation District accomplishes. They work to improve water quality by working directly with farmers to amend practices to reduce or eliminate the potential for fecal contamination of nearby rivers and streams. They work to improve water quality by partnering with the Environmental Health team to provide technical and

financial assistance to local homeowners with failing septic systems. They work to improve habitat through the promotion of native plants and through riparian planting projects to support local landowners. They work to help improve water availability and support fish habitat through partnerships with local irrigation districts. They work with farmers to improve soil health and tilth.

They are a vital partner to numerous landowners in our county, as well as to local and state government and the benefits they work to achieve – like improved water quality – impact all of us. For example, a failing septic system creates an immediate environmental health concern for any nearby resident, but it also leaches contaminants down through the water table. When enough of these contaminants accumulate we see things like large marine areas being closed to shellfish harvesting. This is just one example, but representative of most all of the work that the Conservation District accomplishes.

Even though Conservation Districts are a subdivision of state government, the Legislature has not identified a dedicated source to fund this work. The Clallam Conservation District is funded largely through a variety of grants, allocated through various state and sometimes federal agencies. These grants are typically competitive and are geared to supporting a certain activity; there are no grants available to cover non-programmatic expenses such as maintaining a website, responding to public records requests or managing District elections.

Due to the vital nature of the Clallam Conservation District, and in recognition of the constraints imposed by having no unrestricted resource to carry out basic required functions like the above, the County Commissioners have historically made an annual allocation of General Fund dollars to support this work.

Now, due to the significant budget constraints we and all counties are experiencing, we are no longer in the position of being able to allocate funds to support the Conservation District. Yet their work is more important than ever.

As we have looked outward to other counties and other Conservation Districts, we have learned that the most effective Districts operate with dedicated support from their community, either through a special assessment or through a per parcel and/or per acre fee.

The elected leaders of the Clallam Conservation District have done a thorough analysis of these options and are recommending a \$5 per parcel fee, which is what we are currently considering. In conversation after Tuesday's public hearing on this matter the Board favored moving forward with this \$5 fee, but with some boundaries:

- Setting a ten year "sunset" of this fee so that a future Board of County Commissioners has the opportunity to review the effectiveness and impact of the parcel fee before determining whether to keep it, drop it or amend it.
- Adding language to clarify that the fee will remain at \$5 for the entirety of the ten year period, with no CPI or other cost escalator.
- Requiring an annual report to the Commissioners and the public.

One of my foundational beliefs as an elected official is that once we have gone through a public process that establishes priorities and objectives – in other words, once we as a community have described what we wish to see – it is my job to work with my colleagues and the community to see that we are successful in addressing those priorities and meeting those objectives.

In this case, if we are to be successful in addressing some of our most important priorities and objectives, we need the existence and expertise of the Clallam Conservation District. Since the state has provided us with no dedicated funding but a variety of expected outcomes; we are moving forward with a strategy that will ensure this organization has the ability to meet both the needs of county residents and local governments alike.

I recognize that many in our community struggle to meet their financial needs and that any additional tax or fee is a burden. If we were able to continue to allocate general fund dollars, I would not favor this fee. If it wasn't important to support the agricultural sector in our community, or if we lived in a county with few habitat concerns, I would not favor this fee. If our Comprehensive Plan did not speak both specifically to the importance of the Clallam Conservation District and to the work it supports and facilitates, I would not favor this fee. If I did not believe that this work results in broad community benefit and long-term cost savings, I would not favor this fee.

However, this is not the reality we face and therefore I support the recommendation of the elected leaders of the Clallam Conservation District to move forward with this modest fee, with the guardrails described above.

Sincerely,

Mark Ozias

Subject: Re: 9.2.2025: BOCC Correspondence Submission Clallam Conservation District Parcel Fee Proposal

Subject: Sept. 2 CCD “rates & charges” — since my Aug 20 letter: please VOTE NO or defer; if proceeding, adopt owner protections

Dear Commissioners French, Johnson, and Ozias,

Please enter this correspondence into the record for the September 2, 2025, hearing on the Clallam Conservation District (CCD) parcel “rates & charges.”

What’s changed since my August 20, 2025, email

In the 11 days since my first letter, I’ve reviewed the statute, the draft resolution, and comparable district practices. That work clarified several material points that sharpen my request:

- **Tax-roll collection & liens:** If approved, the CCD charge is placed on property-tax bills, and any unpaid amount becomes a lien with tax-like interest/penalties.
- **Petition safety valve:** If ≥20% of affected owners file a petition by December 15, 2025, the 2026 collection is blocked.
- **Appeals are short and internal to CCD:** Owners have 21 days after the property-tax due date to appeal to CCD; CCD’s decision is final, subject to 21 days for court review.
- **Higher statutory ceiling than many assume:** Current law authorizes up to \$25 per parcel (CPI-indexed going forward) and treats forestland differently (no per-parcel charge; special alternatives).
- **Term is a policy choice:** The statute does not set a minimum or maximum term for “rates & charges,” so a one-year system is lawful.

Bottom line (updated)

Given these mechanics and risks, I now strongly urge a **NO vote** on September 2—or at minimum a deferral until after the November levy outcomes so staff can return with an owner-protective alternative.

If you proceed on Sept. 2, please adopt all five of these safeguards

Each item is lawful and can be included as a condition of approval:

1. One-year only (2026) with a Dec. 31, 2026, sunset and a new public hearing for any renewal.
2. Minimal nominal rates for 2026; for forestland, use the per-owner method permitted by statute (no per-parcel).
3. Automatic relief tied to Assessor records: automatic recognition of low-income senior/disabled approvals; honor other property-tax exemptions; waive while deferrals are active.
4. Appeals people can use: accept appeals online/email/mail/in-person; no prepayment required; apply a preponderance standard with a rebuttable presumption when owners provide credible documents (misclassification/exemption); route land-use/acreage fixes directly to the Assessor.
5. Plain-language notice: mail/post a one-pager that clearly states tax-roll collection, lien if unpaid, the appeal clock, and the Dec. 15 petition right.

Values & funding (unchanged)

I continue to value CCD's on-the-ground work—watershed protection, habitat, soil health, and septic assistance. The question is how to fund it fairly. A short-term, minimal-rate framework with clear relief and due-process protections respects both the law and the people you serve—and lets you reassess after the levy outcomes.

Thank you for considering a path that protects residents and preserves the Board's flexibility. Please **vote NO** on September 2—or defer to allow a better, safer design.

Respectfully,

Cc: Mielke, Todd; Gores, Loni
Subject: CCD Parcel Fee Vote

Commissioners and Administrator Mielke,

Please review the following article outlining the data related to my opposition to Clallam Conservation District's rates and charges parcel fee. I urge you to reconsider your support for this fee and to reject the associated resolution.

Many of CCD's financial and funding claims throughout the rates and charges proposal and hearing process have been misleading, both intentionally and erroneously. CCD has misled the commissioners and the public with regard to what services and expenses are covered by grant funding and have mischaracterized the district's "funding gap", which is its justification for the rates and charges parcel fee.

Additionally, the public benefits that CCD and the commissioners tout have not been directly measured in any verifiable manner. The language in the updated proposal does not rectify this deficiency.

Thank you in advance for your diligent examination into this matter.

Kind regards,

Jacob Seegers

The Clallam CON-servation District

How County Commissioners are backing a "funding crisis" built on bad math, misleading claims, and special interest spin

[JEFF TOZZER](#)

SEP 14, 2025

Guest contributor Jake Seegers shows how county taxpayers have already poured \$625,000 into the Clallam Conservation District without a shred of measurable proof that it delivers results. Now, the district claims it faces a funding "crisis"—despite half a million in reserves, self-sustaining programs, and grant-funded payroll.

Commissioners are echoing CCD's talking points while ignoring math errors, inflated projections, and citizen opposition, all to push through a mandatory \$5 parcel fee. This

isn't conservation—it's fiscal theater, and taxpayers are the ones left paying for the performance.

By Jake Seegers, guest contributor

Strong managerial judgment often falters when profits are high. With abundant cash, disciplined spending can give way to ego-driven expansion. This leads to poorly timed acquisitions that are later reversed or devalued when financial pressure returns. *Time Warner and AOL. News Corp and Myspace. Clallam County and the Clallam Conservation District.*

In 2019, during a budget surplus, the commissioners committed **\$125,000 annually** from the county's general fund to provide CCD with "stable funding." Over five years, taxpayers spent **\$625,000** and commissioners did not require metrics of CCD's claimed benefits. Now, the board intends to spin this burden off onto taxpayers with a mandated \$5 parcel fee—and you don't get a vote.

Friends in High Places

At the September 2nd public hearing, **20 citizens spoke in opposition** to CCD's parcel fee proposal. Their concerns fell on the commissioners' deaf ears. The lone supporting comment was the only one that seemed to register with the commissioners.

Why the disconnect?

- **Commissioner Randy Johnson** has been CCD's most consistent champion since 2019, when he orchestrated a near 500% increase in CCD's county funding. He has described himself as "gungho" for CCD and has consistently praised the district.

Petition to Clallam County Commissioners to Vote Against Clallam Conservation District's 2025 Rates and Charges Proposal

We humbly urge the Board of Clallam County Commissioners to REJECT the 2025 Resolution in the matter of approving a system of rates and charges on parcels within the Clallam Conservation District providing revenues to the district for conservation services and programs.

We oppose the original resolution that was considered by the commissioners during a hearing held by the Board of Clallam County Commissioners on September 2nd, 2025. Additionally, we oppose the revised version of this resolution that Clallam Conservation District will present to the Board of Clallam County Commissioners on or before September 16th, 2025. We urge all three commissioners to vote AGAINST this resolution.

Subject: Support for proposed CCD fee

Please transmit the following to the County Commissioners:

Dear County Commissioners,

I am writing to express my strong support for the Clallam Conservation District's proposal to establish a Rates and Charges system (at a \$5 per parcel fee) to sustain essential core conservation services.

The proposed **\$5 per parcel /per year** is a small contribution for property owners yet will fill critical funding gaps for the Conservation District. It is a big investment to help preserve and improve the natural resources of the peninsula.

With this local revenue, CCD can maintain and expand core programs at current service levels, respond to increasing demand, and continue matching outside grants. Without a stable funding source, some services will be strained, reduced or eliminated, undermining long-term environmental gains.

This fee keeps CCD's operations sustainable and ensures that Clallam County remains proactive—rather than reactive—when addressing water quality and water supply issues, supporting viable agriculture, and managing emerging conservation needs such as wildfire prevention programs.

CCD provides information, technical guidance, and financial support at no cost, leveraging state and federal grants to deliver services that enhance soil productivity, protect water quality, and improve and restore habitat for the good of all county residents. The CCD is a part of the history of this county, as it was built by local farmers for local needs.

CCD is an important part of the natural resources community. We have been purchasing local produce at the Sequim Farmers Market and Chi's Farm for the past several years and find that the fresh produce and thriving farms supported by CCD is critical to what makes Sequim and the surrounding area special. By investing in CCD's programs, together we can support our local farmers by fostering resilient agricultural lands and helping to improve and protect the peninsula's resources.

I respectfully urge the Clallam County Board of Commissioners to adopt the CCD's proposed rates-and-charges proposal as filed. The \$5/parcel fee is an investment in our shared future: it supports local agriculture, protects our water resources, and sustains a non-regulatory, local conservation organization that benefits everyone in Clallam County. Please feel free to contact me at this email if you have questions. Thank you for your consideration of this important local investment in conservation. Together we are stronger!

Sincerely,

Patrice Johnston

Sept. 15, 2025

Dear Clallam County Commissioners,

We are writing to express our support for Clallam Conservation Districts (CCD) proposal to establish a Rates and Charges system at a \$5 parcel fee to sustain essential core conservation services.

CCD is an important part of the natural resource community. As owners of No Goat Farm, we worked with CCD and benefited from their expertise when they wrote the Conservation Plan as part of the process of placing our farmland under a conservation easement. By investing in CCD's programs, together we can: support our local farmers, as No Goat Farm does, by fostering resilient agricultural lands to help improve and protect natural resources in Clallam County for decades to come.

The proposed **\$5 per parcel /per year** will fill critical funding gaps for CCD, helping restore and protect natural resources on the Olympic Peninsula for another 60+ years to come. With this local revenue, CCD can maintain and expand core programs at current service levels, respond to increasing demand, and continue matching state and federal grants. Without a stable funding source, some services will be strained, reduced, or even eliminated, undermining long-term environmental gains.

The proposed \$5 parcel fee will also help keep CCD's operations sustainable and ensure that Clallam County remains proactive, rather than reactive, when addressing issues regarding water quality and quantity, supporting viable agriculture, and tackling emerging conservation needs such as wildfire prevention programs.

For 66 years, CCD has provided information, technical guidance, and financial support for landowners in Clallam County, almost exclusively by leveraging state and federal grants, to deliver services that enhance soil productivity, protect water quality, and improve and restore habitat. CCD is a part of the history of Clallam County - built by local farmers to address local needs.

We respectfully urge the Clallam County Board of Commissioners to adopt CCD's proposed rates-and-charges proposal as filed. The \$5/parcel fee is an investment in our shared future. It supports local agriculture, protects our precious water resources, and sustains a non-regulatory, local conservation that benefits everyone in Clallam County. Please feel free to contact us at rickandhelle@gmail.com if you have questions.

Thank you for your consideration of this important local investment in conservation.

Clallam County Board of Commissioners

Dear County Commissioners,

As a concerned taxpayer and resident of Clallam County regarding the recent reports and financial claims submitted by the Clallam Conservation District (CCD) as well as your ongoing support for the proposed mandatory \$5 parcel fee.

The reports, as analyzed by independent watchdogs, reveal a disturbing pattern of misleading financial data, faulty arithmetic, and unsubstantiated claims of a “funding crisis.” Despite receiving over \$625,000 in stable funding from county taxpayers over the last five years—with no requirement for measurable results—the CCD has failed to demonstrate any tangible benefits to water quality, agriculture, habitat protection, or drought mitigation. Instead, they offer only activity counts (tree plantings, soil tests, seed distributions), which are inputs rather than outcomes. This glaring lack of accountability utterly undermines any justification for imposing new fees on property owners without voter approval.

Further, the CCD’s insistence on a funding gap is contradicted by its own financials, showing sizeable surpluses in 2024 and 2025, supported by abundant reserves exceeding \$480,000. Financial projections used to justify the parcel fee contain math errors—such as a gross miscalculation of cost-of-living adjustments for salaries—that call into question the integrity of their entire budget narrative. It is shocking that these errors and fabrications have not been scrutinized rigorously by the Commission before endorsing this fee.

Moreover, programs that CCD claims are “on the chopping block” if the fee is not approved—like soil testing and native plant sales—are demonstrably self-sustaining and profitable. Grants cover most salaries and overhead, including grant writing and election expenses. Yet, CCD seeks taxpayer dollars to fund activities that should be grant-funded or self-supporting, illustrating fiscal mismanagement rather than fiscal emergency.

It is equally concerning that county commissioners seem to echo CCD’s talking points and ignore the voices of over 20 citizens opposing this parcel fee at recent hearings.

Instead of demanding transparent, evidence-based reporting with measurable outcomes tied to any taxation, the Commission appears willing to mandate tens of millions of dollars in fees based on theatrical claims and special-interest lobbying.

This is not conservation; this is fiscal theater that abuses taxpayer trust and disregards public opinion. I strongly urge the Board to halt any vote on this parcel fee until CCD provides clear, defensible performance metrics proving their value. Taxpayers deserve accountability, truth, and respect—not manufactured crises and financial smoke screens.

Please listen to your constituents and reject this ill-conceived, unsupported tax grab.

I vote not on this wasteful tax.

Sincerely,

Ken Brown

Subject: Support CCD \$5 Fee

You don't often get email from bdcann@gmail.com. [Learn why this is important](#)

Dear County Commissioners,

We are writing to express our strong support for the Clallam Conservation Districts proposal to establish a Rates and Charges fee of \$5 per parcel to sustain essential core conservation services for the next ten years.

- The fee is modest—**\$5/year per parcel**—yet has big impact, funding proven programs: farm planning, native plants, water conservation, soil testing, pasture & manure management, salmon recovery and so much more.
- The fee supports Programs that protect public health and reduce fecal coliform.
- Local funding unlocks matching grants—each dollar collected locally pulls more dollars into Clallam County.
- CCD is non-regulatory and works side-by-side with landowners; this fee sustains the boots-on-the-ground support folks rely on.

With this local revenue, CCD can maintain and expand core programs at current service levels, respond to increasing demand, and continue matching outside grants. Without a stable funding source, some services will be strained, reduced or eliminated, undermining long-term environmental gains.

We are not farmers, but have seen the benefits the conservation district provides to our small farmers, fisherman and others. As consumers, we win. We need to keep them viable with local funding.

We respectfully urge the Clallam County Board of Commissioners to adopt the CCD's proposed rates-and-charges proposal as filed. Please feel free to contact us if you have questions.

Thank you for your consideration of this important local investment in conservation. Together we are stronger!

Sincerely,

Deborah and Robert Cannon

Subject: \$5 per parcel YES

Dear County Commissioners,

I am writing to express my strong support for the Clallam Conservation Districts proposal to establish a Rates and Charges system at \$5 parcel fee to sustain essential core conservation services.

The proposed **\$5 per parcel /per year** is a small contribution for property owners yet will fill critical funding gaps for the Conservation District and help preserve and improve the natural resources of the peninsula.

I respectfully urge the Clallam County Board of Commissioners to adopt the CCD's proposed rates-and-charges proposal as filed. The \$5/parcel fee is an investment in our shared future: it supports local agriculture, protects our precious water resources, and sustains a non-regulatory, local conservation that benefits everyone in Clallam County. Thank you for your consideration of this important local investment in conservation.

Sincerely,

Dear County Commissioners,

I am writing to express my strong support for the Clallam Conservation Districts proposal to establish a Rates and Charges system at \$5 parcel fee to sustain essential core conservation services and to preserve and improve the natural resources of the peninsula.

This small fee will enable the CCD to maintain and expand core programs at current service levels, respond to increasing demand, and continue matching outside grants. Without a stable funding source, some services will be strained, reduced or eliminated, undermining long-term environmental gains.

This fee keeps CCD's operations sustainable and ensures that Clallam County remains proactive—rather than reactive—when addressing water quality and water supply issues, supporting viable agriculture, and emerging conservation needs such as wildfire prevention programs.

For 66 years, CCD has provided information, technical guidance, and financial support at no cost, leveraging state and federal grants to deliver services that enhance soil productivity, protect water quality, and improve and restore habitat for the good of all county residents. The CCD is a part of the history of this county, as it was built by local farmers, for local needs.

CCD is an important part of the natural resources community. As a home owner in the county for over 40 years I have witnessed how CCD's expertise regarding natural resource concerns such as: salmon recovery improvement, soil health

improvement, pasture management, providing native plants to create habitat and reduce water usage, water conservation strategies, and programs to reduce fecal coliform. By investing in CCD's programs, together we can: [pick whatever is relevant to you, we safeguard water quality and water supply, protect salmon and shellfish ecosystems, supports our local farmers by foster resilient agricultural lands] and helps to improve and keep the peninsula pristine.

I urge the Clallam County Board of Commissioners to adopt the CCD's proposed rates-and-charges proposal as filed. The \$5/parcel fee is an investment in our shared future that benefits everyone in Clallam County. Thank you for your consideration of this important local investment in conservation. Subject	Support for Conservation District \$5 per parcel
Comments	The Clallam County Conservation District is at the top of the list of informative County agencies most County residents interact with. Want to find out about water conservation? Call up the friendly, helpful office for an answer. Want to know about or to buy native plants? Ditto. You don't have to be a rancher or a farmer to benefit from information the Conservation District freely shares. Even folks living on city lots can get sound, helpful information. If an extra \$5 per year allows the Conservation District to continue its high level of service to County residents, it is money well spent. Please vote 'Yes' for the increase in parcel tax. The benefits of a well-supported Conservation District will still be cheap at the cost to County residents.

9.17.2025

Dear Clallam County Commissioners,

I am writing to express my support for Clallam Conservation Districts (CCD) proposal to establish a Rates and Charges system at a \$5 parcel fee to sustain essential core conservation services.

The proposed **\$5 per parcel /per year** will fill critical funding gaps for CCD, helping restore and protect natural resources on the Olympic Peninsula for another 60+ years to come. With this local revenue, CCD can maintain and expand core programs at current service levels, respond to increasing demand, and continue matching state and federal grants. Without a stable funding source, some services will be strained, reduced, or even eliminated, undermining long-term environmental gains.

CCD is an important part of the natural resource community. As both a local restoration partner and private landowner in western Clallam County I have witnessed how CCD's expertise regarding natural resource concerns directly benefits local citizens and natural resources. The CCD's staff are knowledgeable, professional, and effective, and they continually leverage their efforts through partnerships and grant opportunities. The benefits of these efforts are cost effective, strategic, and tangible to communities and landowners. The organization I work for, a non-profit focused on salmon restoration, has worked with CCD staff on several projects ranging from riparian restoration opportunities, fish passage improvement, and water quality protections. The local connections and depth of experience that CCD staff bring to these partnership projects is extremely valuable and irreplaceable. By investing in CCD's programs, together we can continue to work to safeguard water quality and water supply, protect salmon and shellfish ecosystems, and improve and protect natural resources in Clallam County for decades to come.

I respectfully urge the Clallam County Board of Commissioners to adopt CCD's proposed rates-and-charges proposal as filed. The \$5/parcel fee is an investment in our shared future. It supports local agriculture, protects our precious water resources, and sustains a non-regulatory, local conservation that benefits everyone in Clallam County. Please feel free to contact me at bkrier@wildsalmoncenter.org if you have questions. Thank you for your consideration of this important local investment in conservation. Together we are stronger!

Sincerely,

Betsy Krier

Dear Lori,

Please accept the attached letter to the County Commissioners regarding the proposed CCD's proposal to begin a \$5 per parcel per year fee program to support the CCD's efforts.

Thank you.

Brianna Noach

9/17/2025

Dear County Commissioners,

I am writing to ask you to pass the proposal of the Clallam Conservation Districts that would set up a Rates and Charges system, charging a \$5 per parcel / per year fee. In this time of climate change and of uncertain federal government support around preserving natural resources, a \$5 fee seems like a small fee to ensure that essential core conservation services continue to be provided. It is my understanding that this will enable CCD to be able to maintain and core programs at their current service levels and even respond to increasing demand. Without this influx of revenue, I fear that long-term environmental gains may be reduced or eliminated.

As a property owner, I am grateful at all the efforts that have been made by the CCD to ensure adequate water supply in drought years like this one, as well as efforts toward wildfire prevention and salmon recovery. I am grateful to all the local farmers who provide needed produce and wish to ensure their long-term viability. The CCD's efforts are vital to these farmers.

I strongly urge the Clallam County Board of Commissioners to adopt the CCD's proposed rates-and-charges proposal as filed. The \$5/parcel fee is an investment in our shared future: it supports local agriculture, protects our precious water resources, and sustains a non-regulatory, local conservation that benefits everyone in Clallam County. Thank you for your consideration of this important local investment in conservation.

Sincerely,

Brianna Noach

To the County Commissioners:

I want to add my support for this pending new \$5 annual fee.

I've been frequenting farm stands and farmer's markets here for years. After reading about how the Conservation District has helped Chi's Farm (my long time favorite), I'm thrilled to offer this support. I know the Conservation District helps all kinds of landowners, not just farms, but we are so very fortunate to have these fresh healthy food sources right here in Clallam County. We should do everything we can to help sustain them. Particularly now in the face of cuts to the farm to school and farm to foodbank funds.

Thank you.

Dear County Commissioners,

I am reaching out to offer my support for the Clallam Conservation District's proposed \$5 parcel fee.

While the fee is small, it will have a huge impact on our county by helping to preserve and improve the natural resources we all regularly enjoy.

With this local revenue, CCD can maintain and expand core programs at current service levels, respond to increasing demand, and continue matching outside grants. Without a stable funding source, some services will be strained, reduced or eliminated, undermining long-term environmental gains.

This fee keeps CCD's operations sustainable and ensures that Clallam County remains proactive—rather than reactive—when addressing water quality and water supply issues, supporting viable agriculture, and emerging conservation needs such as wildfire prevention programs.

By investing in CCD's programs, together we can safeguard water quality, protect salmon, and support our local farmers.

I respectfully urge the Clallam County Board of Commissioners to adopt the CCD's proposed rates-and-charges proposal as filed. The \$5/parcel fee is an investment in our shared future: it supports local agriculture, protects our precious water resources, and sustains a non-regulatory, local conservation that benefits everyone in Clallam County.

Commissioners-

We are opposed to the \$5 parcel fee.

As owners of multiple parcels in Clallam we are opposed to this fee structure of \$5 per parcel.

There is already too much pressure on increased tax burden.

Perhaps a \$5 fee to each property owner independent of number of parcels.

Subject	Proposal for fee for Rates and Charges
Comments	I am writing in support of the proposal for \$5 rate and charge. I support your efforts on conservation of our resources. I personally have benefited from assistance with the planting of native shrubs. I also appreciate the assistance with local agriculture-I am a customer of Chi's roadside stand. Thanks for your consideration, Caroline Perkins

Subject: CCD \$5 tax

You don't often get email from jlpratschner@gmail.com. [Learn why this is important](#)

I demand that CCD and associates be completely accountable, transparent, have no conflict of interest, are not over-compensating workers while not abusing volunteers and workers, and do not expect or make assumptions for this "fee" to continue as it might. If results are not produced then the fee will be stopped. We taxpayers have had it with grifters. And no bonuses for doing the job! Use local personnel. Thank you. Marine dr.

Subject: Support for Conservation District Fee

Dear County Commissioners,

I am writing to express my strong support for the Clallam Conservation Districts proposal to establish a Rates and Charges system at varied \$3-\$5 parcel fee to sustain essential core conservation services.

The proposed annual fee is a small contribution for property owners that will fill critical funding gaps for the Conservation District, it is a big investment to helping preserve and improve the natural resources of the peninsula.

I respectfully urge the Clallam County Board of Commissioners to adopt the CCD's proposed rates-and-charges proposal as filed. The \$5/parcel fee is an investment in our shared future: it supports local agriculture, protects our precious water resources, and sustains a non-regulatory, local conservation that benefits everyone in Clallam County and the Olympic Peninsula. Thank you for your consideration of this important local investment in conservation. Together we are stronger!

Sincerely,

Rae Heselbach

Subject	Support of proposed Conservation District fee
Comments	Dear County Commissioners, We are writing to express our strong support for the Clallam Conservation District's proposal to establish a Rates and Charges system at \$5 parcel fee to sustain essential core conservation services. The proposed \$5 per parcel /per year is a modest fee, but can have a big impact on protecting the natural resources in Clallam County. This funding will give the CCD a stable funding source so it can maintain and expand its programs. For 66 years, CCD has provided information, technical guidance, and financial support at no cost, leveraging state and federal grants to deliver services that enhance soil productivity, protect water quality, and improve and restore habitat. The CCD is a part of the history of this county, as it was built by local farmers, for local needs. As landowners, we have witnessed and used some of the conservation district's programs, such as workshops on pasture management, providing native plants to create habitat and reduce water usage, and water conservation strategies. By investing in CCD's programs, together we can safeguard water quality and supply, support our local farmers, and protect our county's resources to the benefit of all residents. I respectfully urge the Clallam County Board of Commissioners to adopt the CCD's proposed rates-and-charges proposal as filed. The \$5/parcel fee is an investment in our shared future: it supports local agriculture, protects our precious water resources, and sustains non-regulatory, local conservation programs that benefit us all. Please feel free to contact us if

you have questions. Thank you for your consideration of this important local investment in conservation. Together we are stronger!

Sincerely,

Margaret and Bradford Varner

Subject: Support for Conservation District

You don't often get email from katbrid@msn.com. [Learn why this is important](#)

Dear County Commissioners,

I am writing to express my support for the Clallam County Conservation District to establish a rates and charges system at \$5 per parcel to sustain the District's programs.

As a landowner with acreage and horses, I am well aware and appreciative of all the services the District provides. What benefits landowners personally benefits the **entire community** by encouraging and helping with good husbandry practices, planting native plants, conserving water, etc. I am deeply concerned about a group of people locally who are being led by a certain misleading and vocal blog/author who spends all his time fanning flames to attack everything positive in our community, from contributions from the Tribe to environmental practices. It is influencing people in a negative manner and they are becoming more vocal than the majority who really do want and benefit from sound environmental practices. The majority won't be fired up to comment, but they do care and do support the District.

Please feel free to contact me if you have questions.

Thank you,
Katherine Bridwell

You don't often get email from lucy.copass@gmail.com. [Learn why this is important](#)

Board of County Commissioners:

As a Clallam County property owner and voter, I urge your approval of the Clallam County Conservation District's proposal to set a \$5/year, per parcel, charge.

I have been amazed at how much value the CCD provides to our county with very limited staff and office space, and with a governing board made up of citizen volunteers, some elected, some appointed.

Living in the unincorporated (and largely rural) area known as Agnew, I have witnessed the beneficial effects of several Conservation District programs. These include: large-scale planting of trees and shrubs obtained at low cost from the District's annual plant sale; the easy availability of soils testing and advice regarding soil amendment based on the test results; the fostering of livestock management practices that prevent harmful run-off; and the District's active participation at educational events such as the Dungeness River Nature Center's River Festival.

I am also impressed by what I have read about the District's ability to leverage local funds to obtain grants and tap other external sources of funds — for programs that help us maintain and enhance the health, beauty and productivity of the remaining farmland, forests, and fish and wildlife habitat that make this such an extraordinary place to live.

\$5 per year — less than you'd be likely to spend on a quick treat at a drive-through — seems a very modest amount to pay in exchange for all those benefits.

Board of Commissioners of Clallam County
223 E. 4th Street
Port Angeles, WA 98362

Subj: Letter in support of the CCD's proposed parcel assessment

Dear County Commissioners:

I had a 30-year career working on water quality and water quantity management in Clallam County through grants and direct outreach and appreciated partnering with CCD staff and programs throughout that time. I strongly believe the CCD is critical for the combined success of agriculture, small forestry, and water resource sustainability on the NOP.

I understand that the CCD's funding is less secure than ever and agree that this is the time to invoke its authority as a district to generate needed revenue through an assessment in order to achieve its mission.

I appreciate the BOCC's request for modifications of the CCD's proposal and urge you to approve the current resolution before you.

As the CCD says, the \$5/parcel fee once per year is an investment in our shared future: it supports local agriculture, protects our precious water resources, and sustains a non-regulatory, local conservation that benefits everyone in Clallam County. Please feel free to contact me if you have questions.

Thank you for your consideration of this important local investment in conservation.

Sincerely,

Ann Soule, Retired Hydrologist and Water Resource Specialist

Subject: No \$5.00 conservation fee today or in the future

Hi Lori,
Please share my email with the Commissioners.
Thank you, Terri DiMartino, Sequim, Washington

Dear Commissioners:
I have emailed all three of you several times regarding the proposed \$5.00 property tax for the Conservation District. I don't support this \$5.00 tax today or in the future.

The CCD has functioned just fine for 66 years. In that time, other viable organizations like the WSU Extension Program, Department of Ecology, Public Health, Garden Clubs, the Department of Commerce, the ORCA network, and more have fostered all the same goals the CCD is attempting to duplicate.

The Conservation District doesn't employ the same professionals as the organizations named above. To me, they're more like a club/special interest group that's competing with other government agencies.

Please tell this group that they must work within their current budget and put their hands back in their pockets. Clallam County property owners are not a bank for all their non essential projects and whims, \$100K staff salaries & benefits, and new vehicles.

Thank you,
Terri DiMartino

Subject: CCD \$5.00 fee. Opposed

It's upsetting to me that CC commissioners applaud Indian tribe land acquisition while asking the non tribal land owners to pick up the slack. My property taxes just get higher and higher.

The CC water district now asks for funding from property owners. Not the tribes of course. It's only \$5. For now. How about NO. I oppose MORE TAXES. Stop. Stop. Stop.

Subject	\$5 Parcel Free
Comments	I support the Clallam County Conservation District \$5 parcel fee. I find it a shame that we have an anti tax movement demanding transparency while increasing operating costs and man hours on information requests. I understand from a conversation I had last year that one went so far to make a madrive request and the request filled and then refused to pick up the documents. I don't know who it was I just the scenario of what happened. More people should be informed of public's conduct. I enjoy fresh local produce and experiencing nature. I've watched a decline in the health of our environment in my 51 year lifespan and believe it's important to monitor and take action to keep us all healthy. Our environments health starts with healthy microbes that can take decades to recover when destroyed. Our environment goes, we go. I love living here. I appreciate people who understand the science with education and expertise taking action. I am low income and some fees and taxes are a no brainer. This is one of them. Thank you for your time. Rebecca Horst

Subject: Please endorse CCD parcel chargew

You don't often get email from jsyren@ymail.com. [Learn why this is important](#)

Dear Commissioner,

I am writing to express my strong support for the Clallam Conservation Districts proposal to establish a Rates and Charges system at \$5 parcel fee to sustain essential core conservation services.

The proposed \$5 per parcel /per year is a small contribution for property owners yet will fill critical funding gaps for the Conservation District yet it is a big investment to helping preserve and improve the natural resources of the peninsula.

With this local revenue, CCD can maintain and expand core programs at current service levels, respond to increasing demand, and continue matching outside grants. Without a stable funding source, some services will be strained, reduced or eliminated, undermining long-term environmental gains.

This fee keeps CCD's operations sustainable and ensures that Clallam County remains proactive—rather than reactive—when addressing water quality and water supply issues, supporting viable agriculture, and emerging conservation needs such as wildfire prevention programs.

For 66 years, CCD has provided information, technical guidance, and financial support at no cost, leveraging state and federal grants to deliver services that enhance soil productivity, protect water quality, and improve and restore habitat for the good of all county residents. The CCD is a part of the history of this county, as it was built by local farmers, for local needs.

CCD is an important part of the natural resources community. By investing in CCD's programs, together we can safeguard water quality and water supply, protect salmon and shellfish ecosystems, supports our local farmers by foster resilient agricultural lands and help to improve and keep the peninsula pristine.

I respectfully urge the Clallam County Board of Commissioners to adopt the CCD's proposed rates-and-charges proposal as filed. The \$5/parcel fee is an investment in our shared future: it supports local agriculture, protects our precious water resources, and sustains a non-regulatory, local conservation that benefits everyone in Clallam County. Thank you for your consideration of this important local investment in conservation. Together we are stronger!

Sincerely,

Janelle,
Proud supporter of accessible, safe food, water, and local farming.

Commissioners,

Tomorrow, I will deliver over 1,000 signatures requesting that you REJECT the 2025 resolution in the matter of approving a system of rates and charges on parcels within the Clallam Conservation District providing revenues to the district for conservation services and programs.

The current signature audit stands at 1,004, with more being delivered at tomorrow's Commissioner's Board Meeting. I am attaching a scanned copy of the signatures currently in my possession. You will recognize many names from each of your districts.

The level of opposition is unprecedented. More individuals have signed this petition than the 934 voters who participated in the district's last election.

We strongly urge you to listen to the people you were elected to represent and vote against CCD's rates and charges proposal.

Respectfully,

Jake Seegers

Petition to Clallam County Commissioners to Vote Against Clallam

Conservation District's 2025 Rates and Charges Proposal

We humbly urge the Board of Clallam County Commissioners to REJECT the 2025 Resolution in the matter of approving a system of rates and charges on parcels within the Clallam Conservation District providing revenues to the district for conservation services and programs.

We oppose the original resolution that was considered by the commissioners during a hearing held by the Board of Clallam County Commissioners on September 2nd, 2025. Additionally, we oppose the revised version of this resolution that Clallam Conservation District will present to the Board of Clallam County Commissioners on or before September 16th, 2025. We urge all three commissioners to vote AGAINST this resolution.

Petition to Clallam County Commissioners to Vote Against Clallam

Conservation District's 2025 Rates and Charges Proposal

We humbly urge the Board of Clallam County Commissioners to REJECT the 2025 Resolution in the matter of approving a system of rates and charges on parcels within the Clallam Conservation District providing revenues to the district for conservation services and programs.

We oppose the original resolution that was considered by the commissioners during a hearing held by the Board of Clallam County Commissioners on September 2nd, 2025. Additionally, we oppose the revised version of this resolution that Clallam Conservation District will present to the Board of Clallam County Commissioners on or before September 16th, 2025. We urge all three commissioners to vote AGAINST this resolution.

Conservation District's 2025 Rates and Charges Proposal

We humbly urge the Board of Clallam County Commissioners to REJECT the 2025 Resolution in the matter of approving a system of rates and charges on parcels within the Clallam Conservation District providing revenues to the district for conservation services and programs.

We oppose the original resolution that was considered by the commissioners during a hearing held by the Board of Clallam County Commissioners on September 2nd, 2025. Additionally, we oppose the revised version of this resolution that Clallam Conservation District will present to the Board of Clallam County Commissioners on or before September 16th, 2025. We urge all three commissioners to vote AGAINST this resolution.

Petition to Clallam County Commissioners to Vote Against Clallam Conservation District's 2025 Rates and Charges Proposal

We humbly urge the Board of Clallam County Commissioners to REJECT the 2025 Resolution in the matter of approving a system of rates and charges on parcels within the Clallam Conservation District providing revenues to the district for conservation services and programs.

We oppose the original resolution that was considered by the commissioners during a hearing held by the Board of Clallam County Commissioners on September 2nd, 2025. Additionally, we oppose the revised version of this resolution that Clallam Conservation District will present to the Board of Clallam County Commissioners on or before September 16th, 2025. We urge all three commissioners to vote AGAINST this resolution.

Petition to Clallam County Commissioners to Vote Against Clallam Conservation District's 2025 Rates and Charges Proposal

We humbly urge the Board of Clallam County Commissioners to REJECT the 2025 Resolution in the matter of approving a system of rates and charges on parcels within the Clallam Conservation District providing revenues to the district for conservation services and programs.

We oppose the original resolution that was considered by the commissioners during a hearing held by the Board of Clallam County Commissioners on September 2nd, 2025. Additionally, we oppose the revised version of this resolution that Clallam Conservation District will present to the Board of Clallam County Commissioners on or before September 16th, 2025. We urge all three commissioners to vote AGAINST this resolution.

Public Comment
Virginia Shogren
9/23/25

Public Comment
Clallam County Board of Commissioners
September 23, 2025

**Public Comment Against Proposed Property Tax
for Clallam Conservation District**

I previously alerted the County in writing that the proposed Resolution for a property tax increase for the Conservation District appears to violate state law that prohibits Conservation Districts from levying taxes. I also alerted the County that the resolution appears to be unconstitutional on several grounds, and lacks a predicate basis due to the CCD's apparent violation of the Open Public Meetings Act on July 29, 2025.

If this weren't enough, the CCD appears to lack a designated treasurer as required by law. The Conservation District is an agency of the state that handles public money and is required to have a designated treasurer as its fiscal officer.

RCW 89.08.215 is not optional. The Board must designate a treasurer by resolution.

I have attended monthly CCD Board meetings and have never heard a treasurer speak. The treasurer's reports have been anonymous and in writing only.

I e-mailed the Conservation District and asked who is the CCD's treasurer. Kim Williams responded saying she did not understand my question.

I asked the Board during the next public comment period who their designated treasurer is. I got no response.

I emailed again and requested the identity of the treasurer and the resolution designating that person as treasurer along with documentation of the treasurer's background and credentials to act as treasurer as required by the statute.

In response, I received a single page document. It is a resolution from a quarter century ago. It does not name any particular person as treasurer of CCD and does not cite to the treasurer statute.

In that same response, Ms. Williams belatedly declared herself to be the treasurer of CCD with complete financial oversight. But she provided no documentation to corroborate her self-declaration.

The Conservation District cannot lawfully receive grant funds without a designated treasurer. It is my understanding that if a state agency lacks a treasurer, public funds must be deposited into the State Treasury.

In my opinion, this issue falls into a troubling pattern of problems with the CCD which only seem to make this Board want to *reward* the CCD with *more taxpayer money*. From grant fraud in the form of accepting millions of dollars for pipeline projects without pipeline easements in place, to influence peddling, to essentially laundering public money into private insider pockets, to censorship of public comment, to the unlawful collection of a general fund of taxes for an entity that was established in order to provide voluntary soil conservation services.

We see it all and we do not consent.

Thank you.

Virginia P. Shogren
961 W. Oak Court
Sequim, WA 98382

Encls.

RCW 89.08.215**Treasurer—Powers and duties—Bond.**

(1) The treasurer of the county in which a conservation district is located is ex officio treasurer of the district. However, the board of supervisors by resolution may designate some other person having experience in financial or fiscal matters as treasurer of the conservation district. The board of supervisors shall require a bond, with a surety company authorized to do business in the state of Washington, in an amount and under the terms and conditions which the board of supervisors by resolution from time to time finds will protect the district against loss. The premium on this bond shall be paid by the district.

(2) All district funds shall be paid to the treasurer and disbursed only on warrants issued by an auditor appointed by the board of supervisors, upon orders or vouchers approved by it. The treasurer shall establish a conservation district fund into which shall be paid all district funds. The treasurer shall maintain any special funds created by the board of supervisors for the placement of all money as the board of supervisors may, by resolution, direct.

(3) If the treasurer of the district is the treasurer of the county all district funds shall be deposited with the county depositories under the same restrictions, contracts, and security as provided for county depositories. If the treasurer of the district is some other person, all funds shall be deposited in a bank or banks authorized to do business in this state as the board of supervisors, by resolution, designates.

(4) A district may provide and require a reasonable bond of any other person handling moneys or securities of the district, if the district pays the premium.

(5)(a) A district may disburse funds in payment of salaries, wages, and any other approved financial reimbursement to any employee or contractor of the district to any financial institution for either: (i) Credit to the employees' or contractors' accounts in such financial institution; or (ii) immediate transfer therefrom to the employees' or contractors' accounts in any other financial institutions.

(b) As used in this subsection (5), "financial institution" has the definition in RCW 41.04.240.

[2013 c 164 s 2; 2000 c 45 s 2.]

Clallam Conservation District
August 1, 2000
Resolution No. 00-08-01

WHEREAS, The Washington State Legislature adopted SHB 2348, enrolled on March 22, 2000, amending RCW 89.08.210 to allow the official transfer of conservation district treasurer functions from county government to the district; therefore be it

RESOLVED, that the Clallam Conservation District employee primarily tasked with financial accounting for purposes of 89.08.210 be assigned the role of District Treasurer; and further

RESOLVED, that the Clallam Conservation District board member elected to serve as Secretary/Treasurer for purposes of 89.08.210 be assigned the role of District Auditor; and further

RESOLVED, That the Clallam Conservation District bond the District Treasurer and District Auditor as well as any individuals who are authorized to sign checks.

DATED the 1st day of August, 2000

A handwritten signature in blue ink, appearing to read "Matt Heins", is written over a horizontal line.

Matt Heins,
Chair
